

Mint of the United States at Philadelphia,

MELTING AND REFINING DEPARTMENT,

Philadelphia, 2nd January, 1883.

Sir,

I respectfully state, in reply to your questions as to the usefulness, &c. of the large White-ware Jars, made by R. C. Remmey, of this City, — that we have been and are now using a number of them advantageously for chemical operations in the Refinery, — that we can employ a much larger number, say several hundred, especially for working up residues, with economical results for the Government — that a price of about fifteen dollars for each is a moderate one, — and that we ^{can} store them profitably for future use.

Very respectfully,
Hon A. Loudon Snowden, J. C. Booth,
Superintendent. M. F. R.
